Ambition to capture 10% of global market

CATAPULT
Satellite Applications

Catapult Programmes

The Catapult has four main business programmes:

Integrated Transport Systems

Using satellite applications, communications and navigation systems to improve transport and Autonomous Air Land and Sea.

Blue Economy

Supporting sustainable use and preservation of the marine environment with satellite data.

Sustainable Living

Improving environmental, social development of cities, agriculture and energy.

Government Services

Providing a strategic national initiative to drive capabilities in use of satellite products with various across government requirements to enable smarter more efficient operations.

Innovating for a better world, empowered by satellite.
